WEB ACTIVITY REPORT

HTML and CSS Website Projects

Name: Pardhavi Seelamsetty
Section: CSE - 2
Roll No: 26000128

This report documents three web development activities. Each activity includes a brief explanation of the website's purpose, main sections, and use of HTML and CSS, along with the screenshots provided.

ACTIVITY 1

Pardhavi Seelamsetty
Section: CSE - 2
Roll No: 26000128

Sweet Treats Bakery Website

Sweet Treats Bakery is a bakery product-display website. It introduces the bakery, shows baked items and prices, highlights an offer, and provides contact information.

Purpose

Visitors can browse bakery products, read descriptions, compare prices, and find the bakery's contact details.

Header and navigation

The header displays the bakery name and tagline. The navigation links lead to Home, Our Products, Offers, and Contact.

Products section

Product cards display pictures, names, descriptions, and prices for chocolate cake, vanilla cupcakes, chocolate cookies, fresh pastries, brookies, and macarons.

Offers and contact

The special-offer section advertises a discount. The contact section shows the address, email, and opening hours.

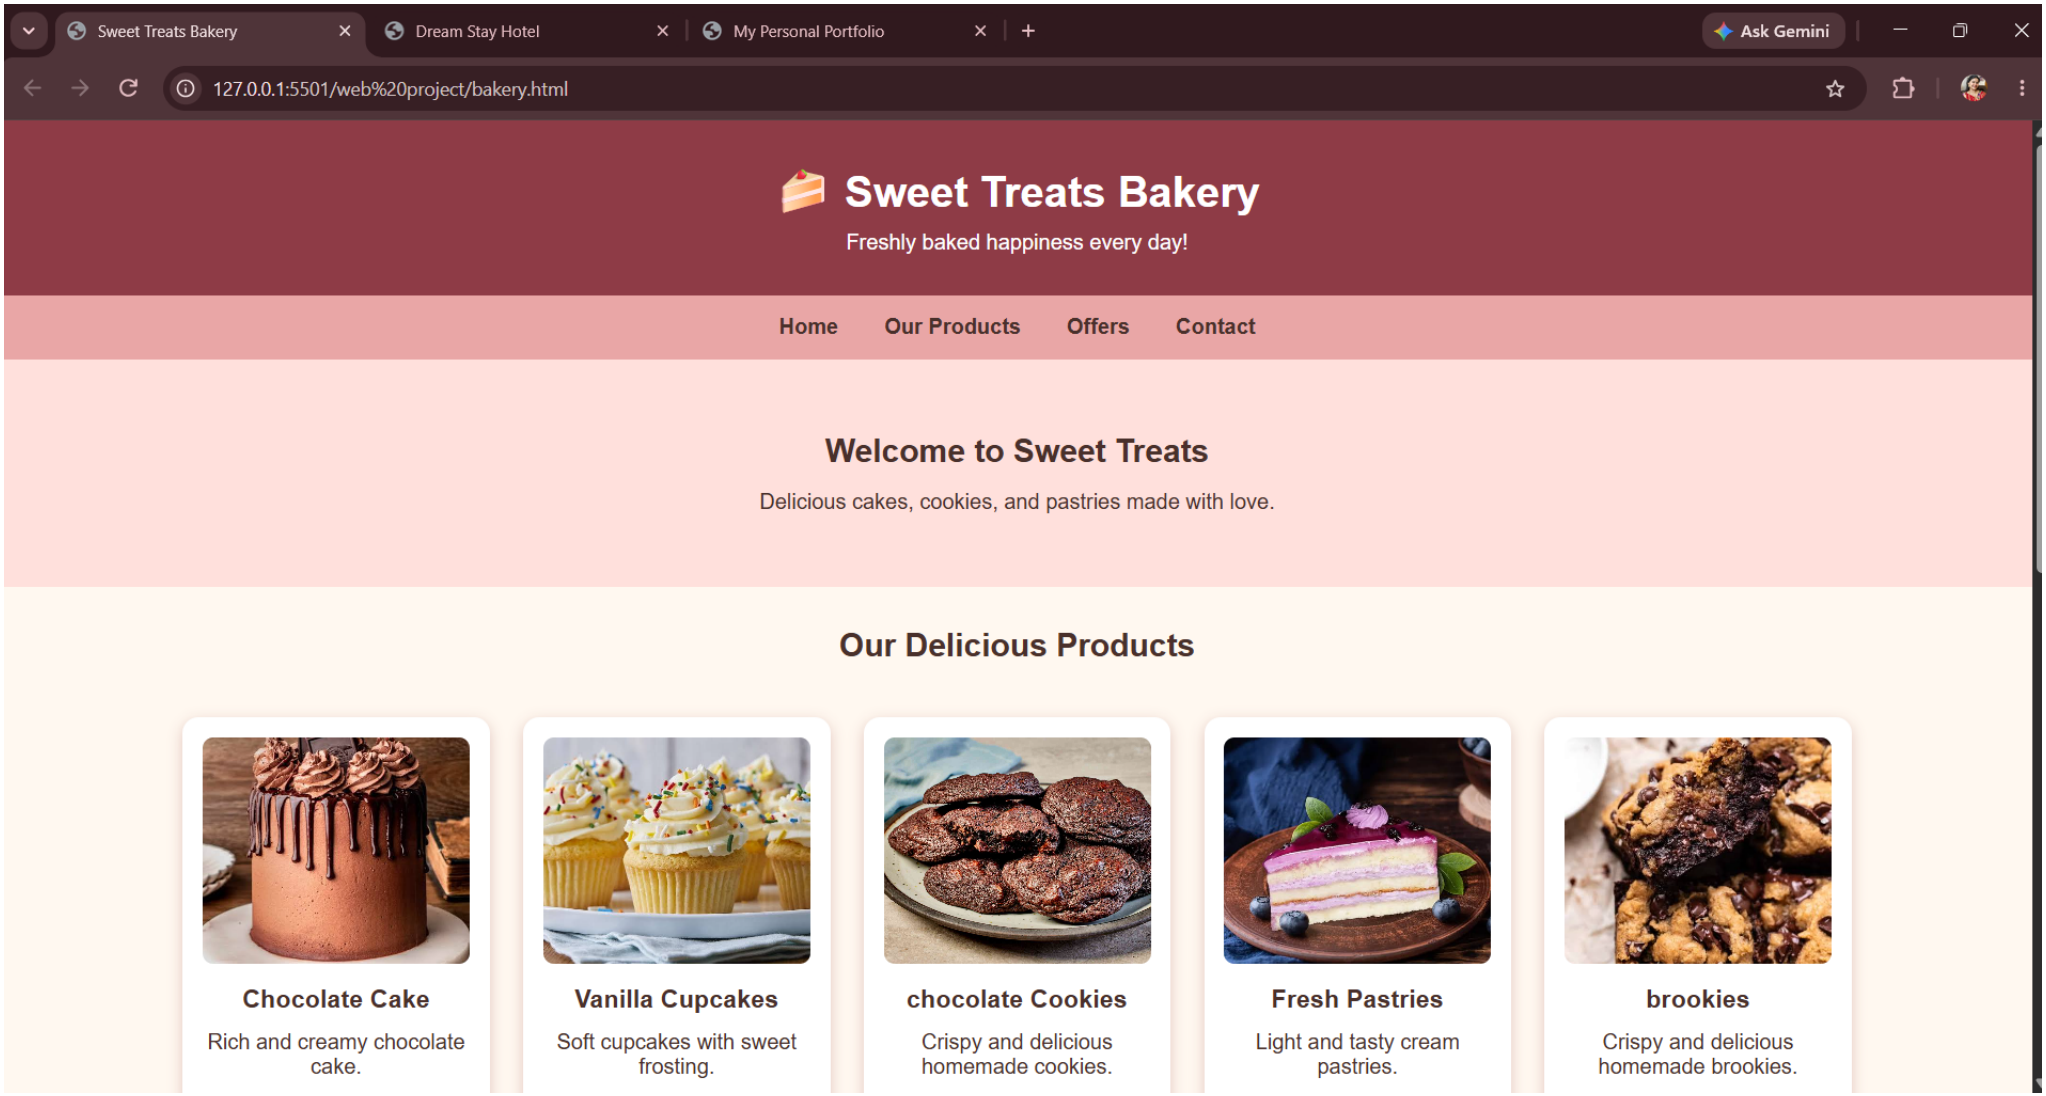

HTML and CSS

HTML structures the page into sections and product cards. CSS styles the pink and cream colours, spacing, rounded corners, shadows, images, and text.

Screenshots

The following screenshots show the completed website and its visible sections.

ACTIVITY 1 — Screenshot 1

Chocolate Cake

Rich and creamy chocolate cake.

₹450

Vanilla Cupcakes

ACTIVITY 2

Pardhavi Seelamsetty
Section: CSE - 2
Roll No: 26000128

Dream Stay Hotel Website

Dream Stay Hotel is a hotel information and room-reservation demonstration website. It displays room options and facilities and includes a booking form.

Purpose

Visitors can learn about the hotel, compare room types and sample prices, and enter details in the reservation form.

Header and welcome section

The header contains the hotel name and navigation links. The hero section uses a large hotel image and a Reserve a Room button.

Rooms and facilities

Cards display Standard Room, Deluxe Room, and Luxury Suite options with photos, descriptions, and prices. Facilities include Wi-Fi, restaurant, swimming pool, parking, air conditioning, and room service.

Booking form

The form asks for full name, email, check-in and check-out dates, room type, and number of guests. A real booking system would need additional backend functionality.

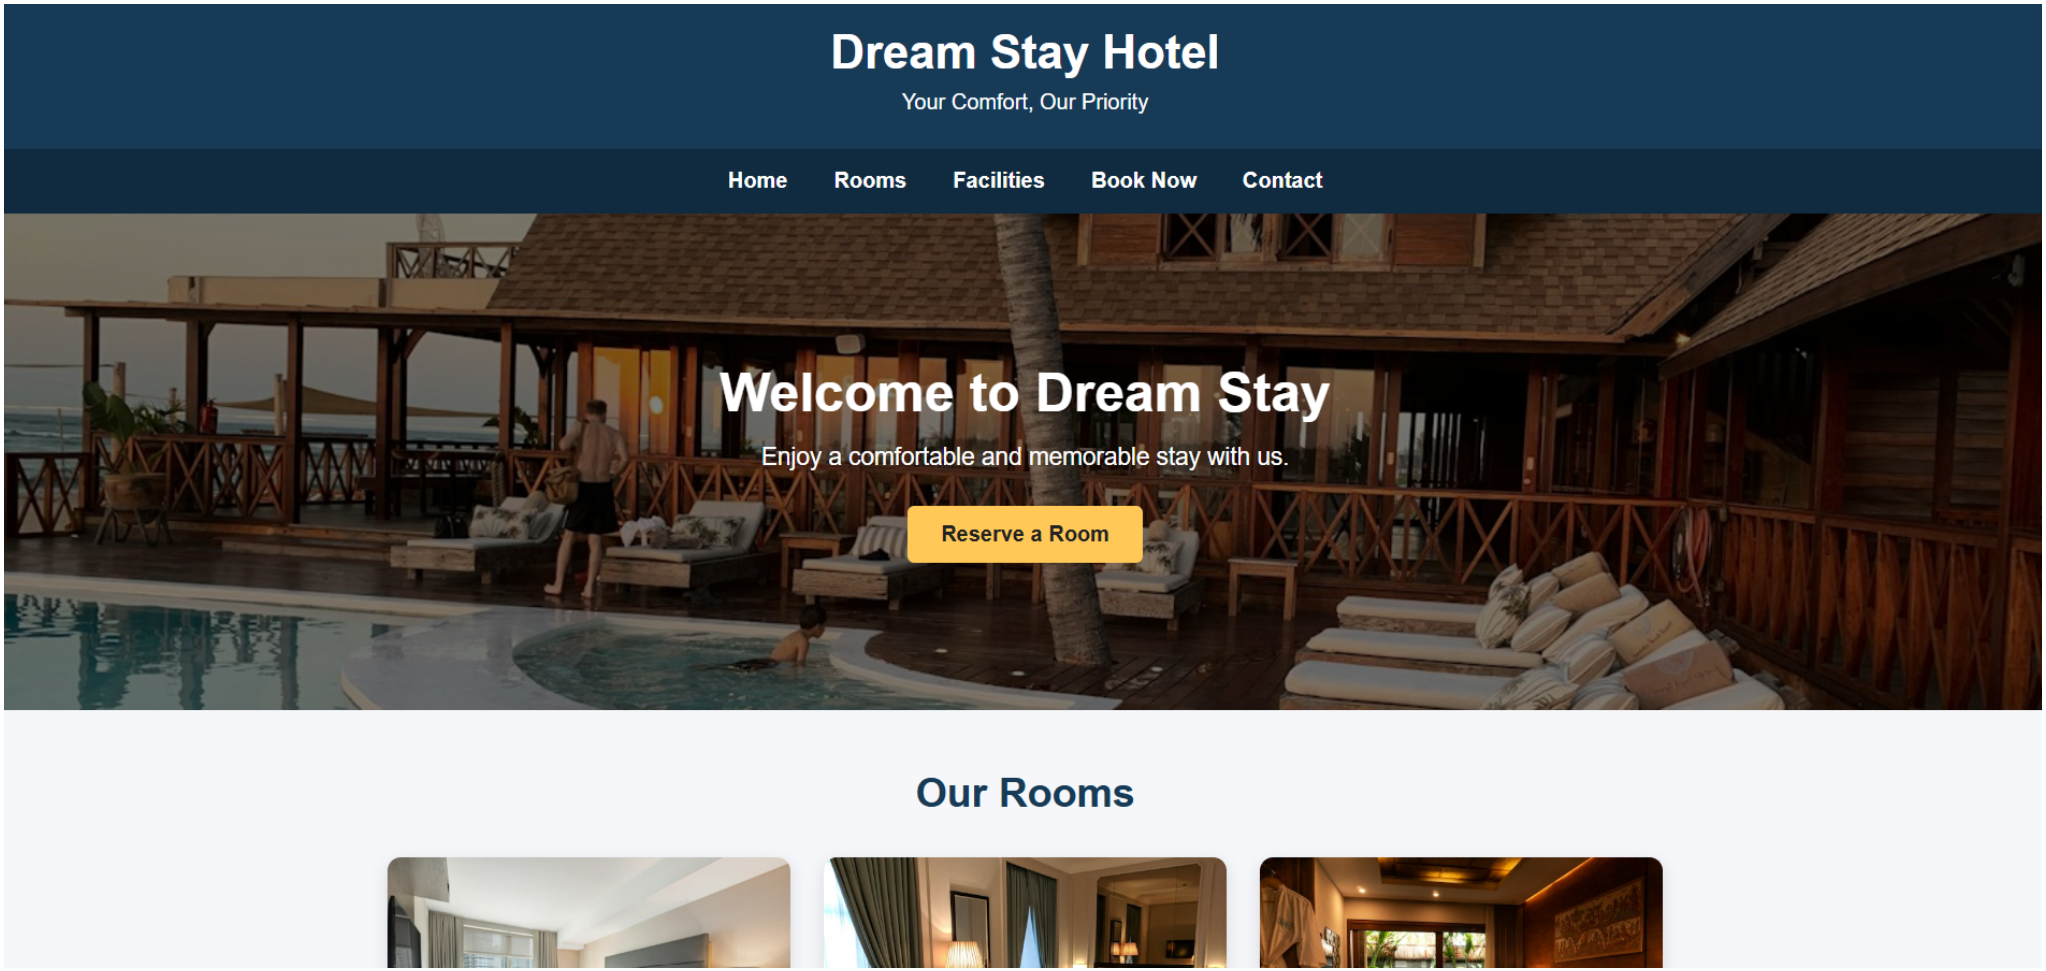

HTML and CSS

HTML provides the content and form fields. CSS controls the blue theme, layout, room cards, spacing, and buttons.

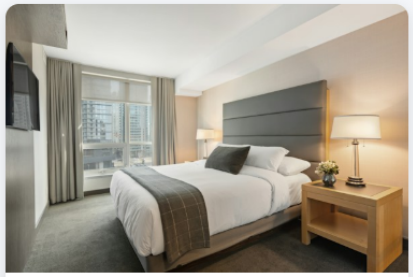

Screenshots

The following screenshots show the completed website and its visible sections.

ACTIVITY 2 — Screenshot 4

Our Rooms

Standard Room

Comfortable room for a relaxing stay.

₹2,000 / night

My Personal Portfolio Website

My Personal Portfolio is a student profile website that presents education, technical skills, projects, hobbies, and contact information.

Purpose

The portfolio introduces the student and showcases learning, interests, and beginner web-development projects.

Header and navigation

The page title and welcome message appear at the top. Navigation links lead to About Me, Education, Skills, Projects, and Contact.

About Me and education

These sections introduce the student's interest in technology and list college and intermediate education details.

Skills and projects

The skills section lists HTML, CSS, basic computer skills, and communication. The projects section describes the Movie Review Website and Bakery Website.

Hobbies, contact, and styling

The hobbies section lists personal interests and the contact section displays contact details. HTML organizes the content, while CSS creates the blue-and-white theme, cards, borders, spacing, and headings.

Screenshots

The following screenshots show the completed website and its visible sections.
